B : Read the passage and answer the questions .

Heart is a strong pump that sends the blood around your body . It works all the time , even when you are sleeping . It pumps blood that is full of oxygen and food to every part of your body . You have blood everywhere inside your body . A blood sample is usually 45% blood cells and 55% plasma . The blood cells move in a yellow liquid . The liquid is called plasma. It carries blood cells .

Types of blood cells are *red blood cells* and *white blood cells*.

Red blood cells give the blood its red color . There are 5 million of them in a drop of blood. They are so small that you can't see them with your eyes . You can see them with a microscope . The red blood cells carry oxygen to every part of your body . White blood cells are larger than red ones , but there are less of them . There are 8000 in one drop of blood . They defend your body against microbes.

35. According to the passage , it is NOT true that

- a) plasma carries white and red blood cells
- b) the number of blood cells is less than plasma
- c) red blood cells are not smaller than white blood cells
- d) your blood has less white blood cells than red blood cells

36. Which one is not in your blood ?

- a) red blood cell b) plasma
- c) heart d) white blood cell

37. You can't see red blood cells without a microscope . True False

38. The blood is red because of red blood cells . True False

39. What carries oxygen around the body ?

.....

40. How many white blood cells are there in a drop of blood ?

.....
